

TAKE ACTION FOR QUÉBEC

THE STAND TOGETHER CAMPAIGN WILL CARRY OUT ACTIONS IN ALL REGIONS OF QUÉBEC.

In addition to those local initiatives, major demonstrations are planned for November 29 and May 1. We will make our voices heard!

We are calling on actors across the political spectrum to endorse our demands. We must fight to force the current government to back down from its attacks on workers and we must also win the support of the political parties.

We are fighting for Québec—a Québec that believes in its workers, in decent public services and in environmental responsibility.

STAND TOGETHER

FOR QUÉBEC

QUÉBEC CAN DO BETTER.

QUÉBEC MUST DO BETTER.

Better than what our government has been doing. After seven years in power, the CAQ has abandoned all pretence. It now serves only the interests of big business and dismisses everyone else's concerns.

It has no solutions to the housing crisis.

It has nothing but contempt to offer workers who want to improve their living conditions.

It has no answers for people who need access to healthcare and social services.

It has nothing to say about helping students in our schools.

When parents ask for a daycare spot for their child, the government looks the other way.

When thousands of Quebecers demand action on the climate crisis, it turns a deaf ear.

This government does nothing about the real problems and tries to deflect attention by attacking workers and their unions.

The CAQ government isn't acting alone. It has many allies intent on dismantling Québec's social model. They use arguments that undermine social harmony to win votes. They are sore losers who cannot accept that thousands of workers stood up to improve their conditions. We're talking about corporations like Amazon, which would rather pack up and leave than obey our laws, and politicians who would rather take a

page from Trump's playbook than deal with the problems that affect their constituents.

In the face of these attacks on workers, doing nothing is not an option. That is why the CSN is calling for unity. We must stand together to demand decent conditions for workers, reliable public services for ourselves and our loved ones, and a livable planet for our children.

Our demands

1 STAND TOGETHER FOR WORKERS

An attack on unions is an attack on workers— on beneficiary attendants, daycare workers, teachers, grocery store employees, forestry workers. And it's an attack on organizations that stand up to the powerful on every front: unions don't just defend workers, they also fight policies that are detrimental to the common good.

All political parties must commit to repealing laws and bills that attack workers.

2 STAND TOGETHER FOR PUBLIC SERVICES

It is essential to preserve public services in Québec. They have been underfunded for decades and their current state of deterioration shows it. Healthcare is being privatized, the schools are crumbling, the budgets of government ministries are being slashed. The dismantling of the Québec state must stop.

All political parties must commit to adequately funding Québec's public services.

3 STAND TOGETHER FOR THE PLANET

The climate crisis is an immense challenge. Yet for decades, the parties in power have refused to act. In fact, we now seem to be moving backward. The government's retreat from funding infrastructure such as public transit is torpedoing our efforts to meet our greenhouse gas reduction targets.

All political parties must commit to immediate action for a just transition and to creating the jobs of the future, starting with appropriate funding for public transit in view of the challenges we face.
